Introduction

The following comprises a list of publications that rely on data from the Human Mortality Database (HMD) or the Berkeley Mortality Database (BMD). Works that used the BMD are identified by “[BMD]” at the end of the citation; all other publications used the HMD. This list is probably not a complete list of all publications based on the HMD, as there may be others that remain unknown to us.

The publications are grouped into six categories: i) official reports, ii) books and book chapters, iii) journal articles, iv) dissertations and theses, v) technical reports and working papers.
